Hills of Gold Wind Farm Community Newsletter

June 2026

Hello Community Members,

Thank you to everyone who joined us recently at the Nundle Bowling Club for the Community BBQ.

It was a great opportunity to catch up with the community, meet with the project team and learn more about what's ahead for the Hills of Gold Wind Farm.

Since 2017, the project has been through a long and, at times, challenging journey. As many of you will be aware, in March 2026 the Hills of Gold Wind Farm received final approval from the NSW Land and Environment Court.

The Someva project team is now moving into the next stage, which includes detailed design of the turbine layout and grid connection, along with procurement and pre-construction planning.

We sincerely thank our community for your support, resilience, and ongoing engagement, which have been instrumental in reaching this important milestone.

Jamie Chivers, Managing Director at Someva Renewables, speaking with community members at the Nundle Bowling Club BBQ event 29 May 2026.

Project team members Tom Stokes, Engineering Manager, and Jeff Boulous, Community Engagement Manager, cooking at the Nundle Bowling Club BBQ event.

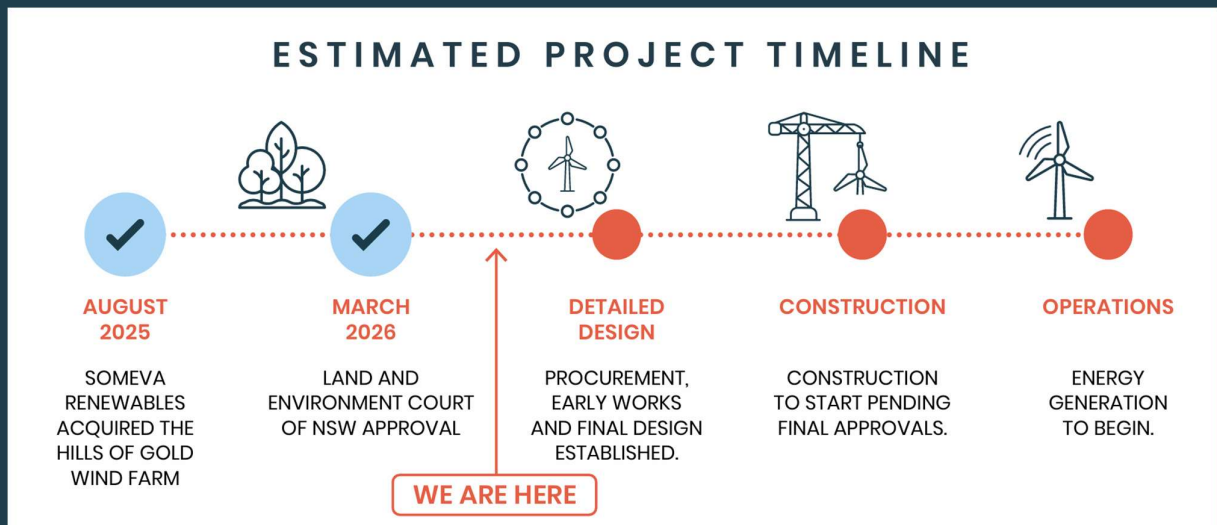

Local business opportunities

We have released 26 work packages for the Hills of Gold Wind Farm on the ICN Gateway to support local and regional participation. Businesses are encouraged to register an Expression of Interest for opportunities such as earthworks, road and hardstand construction, logistics, fencing, quarry materials, dust suppression, concrete supply, electrical cabling, cleaning, project management and related services. Submissions will remain open on the ICN Gateway till June 2027.

It is expected that most work packages listed on ICN Gateway will be contracted through our selected head contractors, including Wind Turbine Supply and Install and Balance of Plant contractors. The project is estimated to provide employment for up to 211 personnel during construction and 28 personnel during operations. [Learn more on the ICN Gateway.](#)

Project Timeline

We have updated the project Fact Sheet with the latest information about Hills of Gold Wind Farm and our estimated project timeline details. [Learn more](#)

About Someva

Someva Renewables is a NSW-based, 100% Australian-owned renewable energy company that works with landowners, communities and industry leaders to deliver clean, affordable and reliable energy for Australia's future.

Since 2017, Someva has partnered with Clean Energy Partners and ENGIE on the proposed Hills of Gold Wind Farm, leading development works, technical studies and supporting community and stakeholder engagement. Someva Renewables was proud to acquire the Hills of Gold Wind Farm project in August 2025.

Stay Connected

We remain committed to open communication with the Nundle community, the broader region and local stakeholders. We will continue sharing regular community newsletters and website updates as the project moves through detailed design, procurement planning and pre-construction activities.

If you need have a question about the project, need to contact us or would like to subscribe to our newsletter please email community@someva.com.au. You can also learn more about the project and Someva Renewables on our [website](#).

Kind regards,
Felicity
